

BEHAVE Web application perceived usability test

The following questionnaire helps developers and researchers to measure the perceived usability of BEHAVE application. The questionnaire used is the Computer System Usability Questionnaire (CSUQ) version 3, extracted from James R. Lewis (2018). Measuring Perceived Usability: SUS, UMUX, and CSUQ Ratings for Four Everyday Products, International Journal of Human–Computer Interaction, DOI: 10.1080/10447318.2018.1533152
