Behavior Management Hub: troubleshooting and plans for the future

The general purpose of the BMH is

To provide a virtual space where Teachers interested in models about behaviors management can meet together, discuss innovative teaching ideas, share experiences

To serve as an online repository of teaching tips and strategies created by the use of the BEHAVE application

THE BMH will include the following features

1 2 3 4

OER

A **repository** where the contents of the project training activities will be released as **Open Educational Resources**

DATA SURVEY

A **repository** collecting the **data** gathered during the project **survey**

MATERIALS

A space where the experts of the partnership can spread **high quality materials** or **good practices** worth of mention about **behavior management models** or techniques

INFO DESK

An **information desk** where the trained teachers can stay in touch with their trainers getting **feedback** and **suggestions** from them about how to transfer in their school environment what they have learned during the training courses

Houston, we've had a problem here!

This output is at risk!

We need your efforts and cooperation to avoid the danger that the budget will be cut!

The only objective achieved until now has been the creation of the repository

A twofold strategy

INTERNAL STRATEGY

Use the **HUB** during the **training courses**

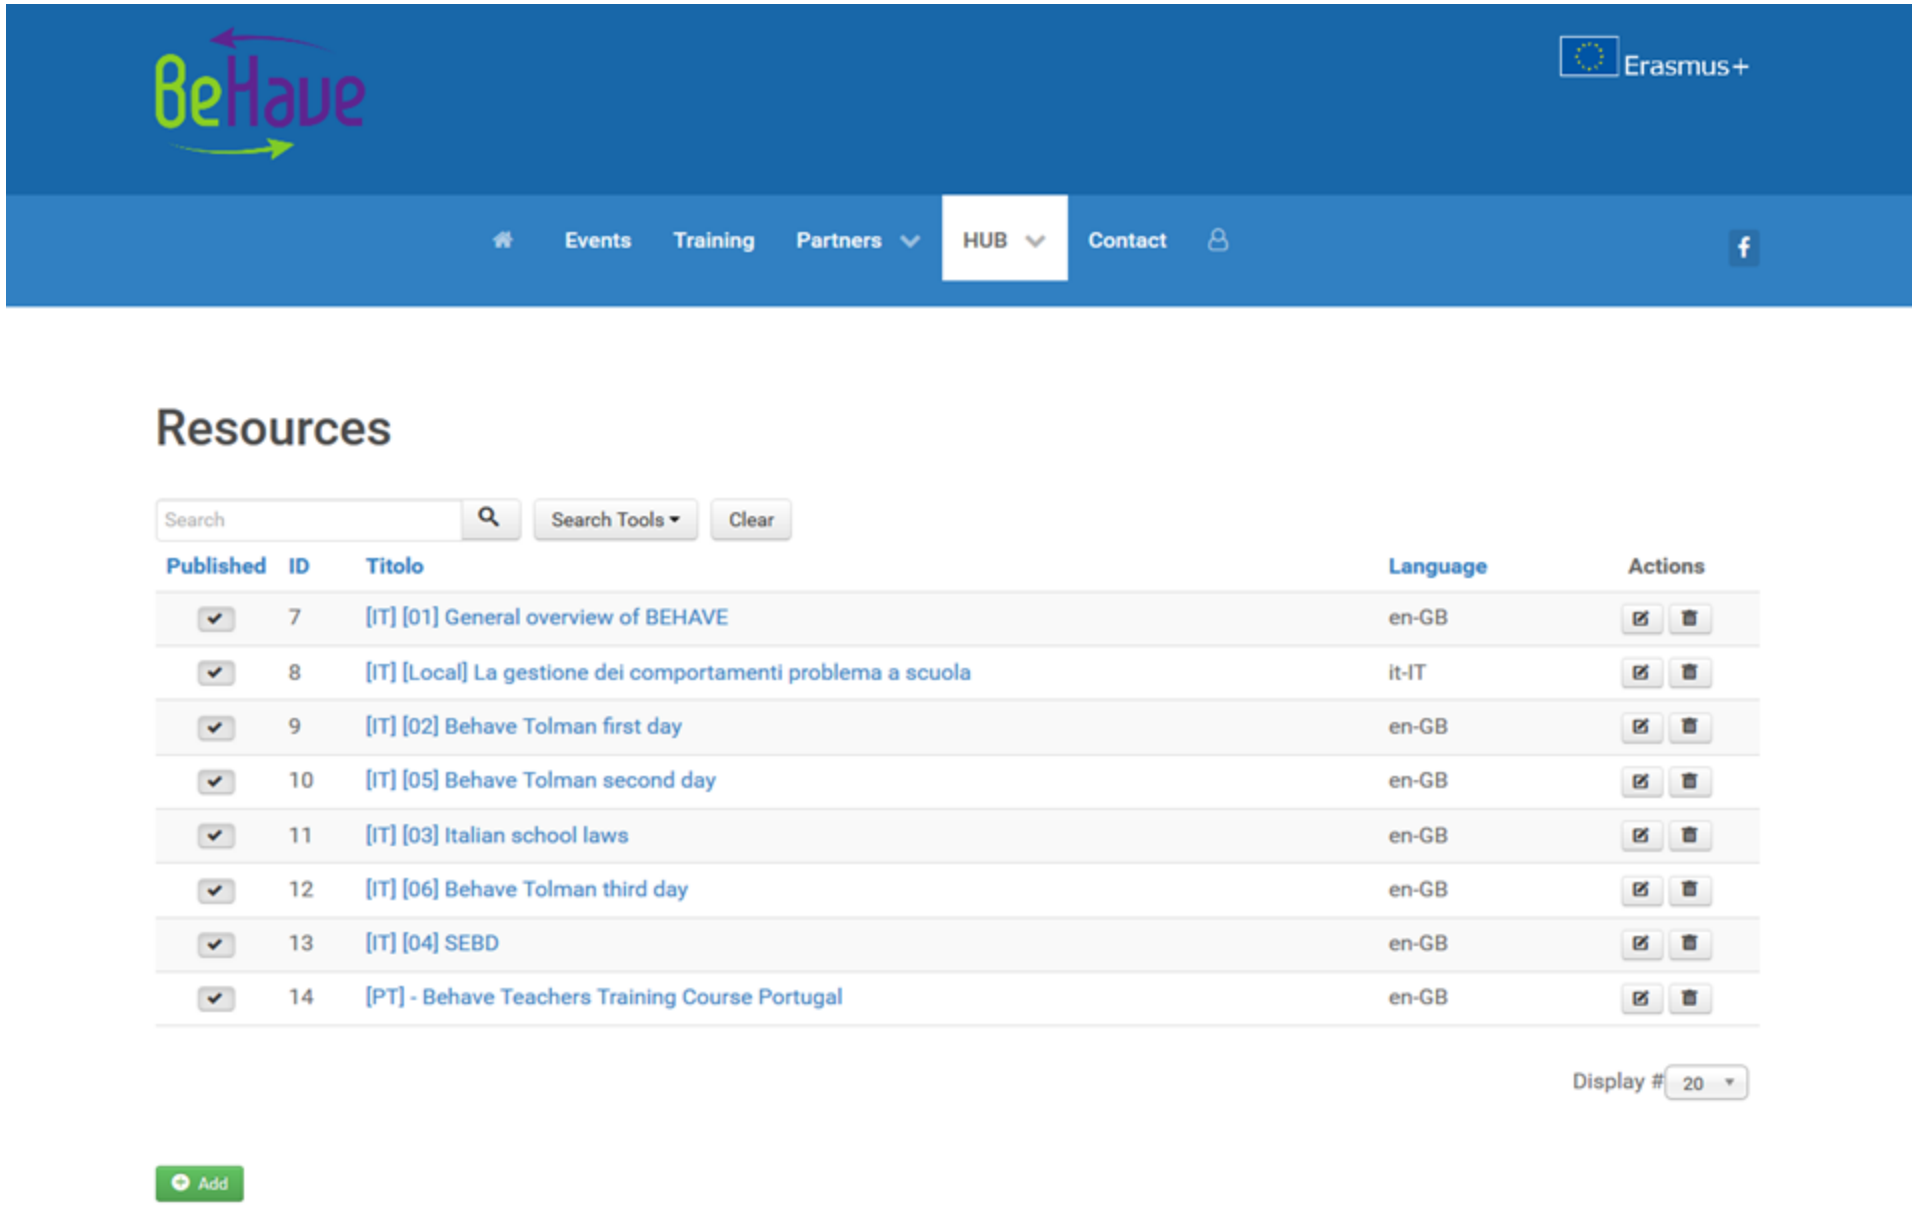
Aggregate high quality contents

EXTERNAL STRATEGY

Build a **virtual community** of **teachers** accessing materials and/or practices

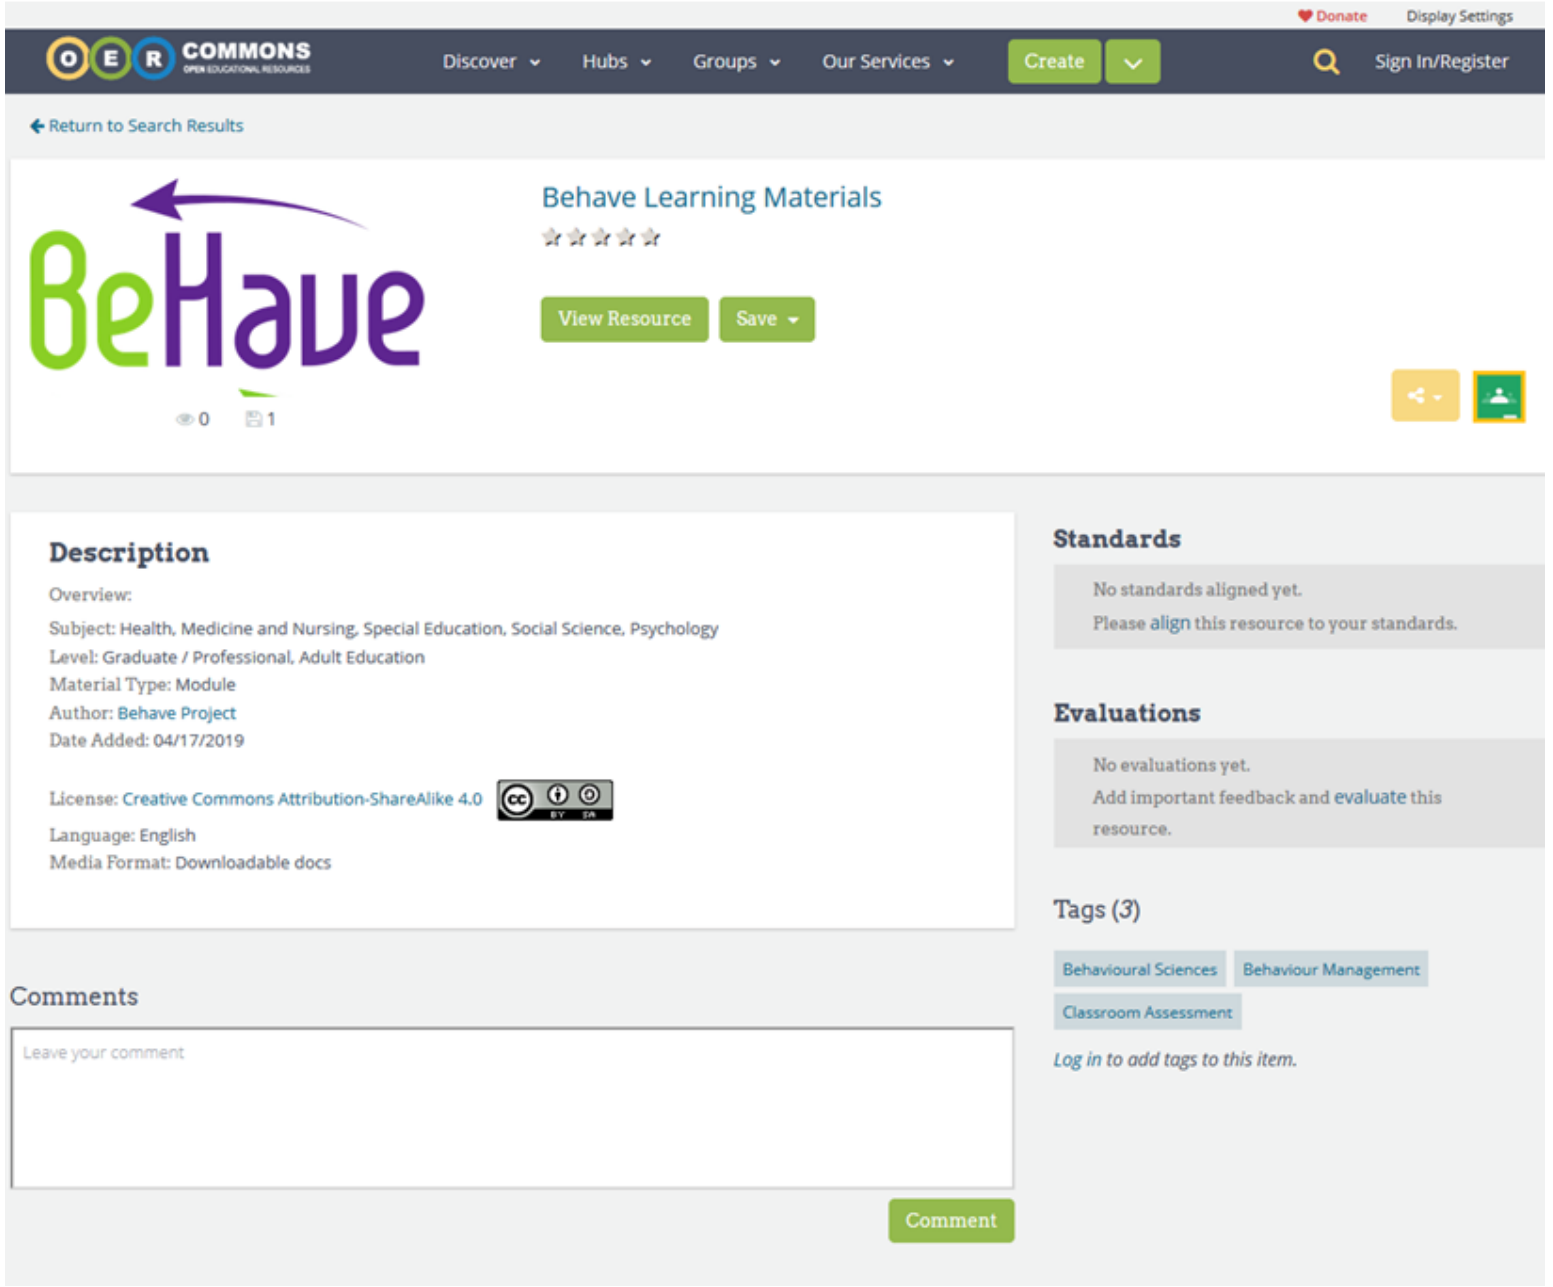
OER

A **repository** where the contents of the project training activities will be released as **Open Educational Resources**



OER

A **repository** where the contents of the project training activities will be released as **Open Educational Resources**



https://www.oercommons.org/courseware/module/53493

DATA SURVEY

A **repository** collecting the **data** gathered during the project **survey**

At this moment , the **surveys** are **ready** and **34/50** filled questionnaire were collected.

When the task will be completed, **UC Leuven** will start to **analyze** the collected data and **ITD** will **publish** it on the **HUB**.

MATERIALS

A space where the experts of the partnership can spread **high quality materials** or **good practices** worth of mention about **behavior management models** or techniques

A new section on the HUB could be an aggregator of articles worth of mention about the management of problem behavior at school.

We ask each scientific partner to find 3/4 articles worth of mention on the Internet to be published on a new section of the HUB.

Users of the HUB will be able to propose new interesting URLs to increase the collection prepared by partners.

INFO DESK

An **information desk** where the trained teachers can stay in touch with their trainers getting **feedback** and **suggestions** from them about how to transfer in their school environment what they have learned during the training courses

INTERNAL STRATEGY

INTERNAL STRATEGY

Teachers involved in the **training program** will use the **HUB** during the remaining training courses in **UK**, **RM**, and **BE** to collect their experiences at school about the application of the strategies to manage undesidered behaviours.

In UK, teachers will describe a **case study**, and will be supported to define an **intervention plan** according to the knowledge acquired during the courses.

Create a **Temporary Working Group** consisting of a **referent teacher** for each school involved in the project. He will have the responsibility to **guarantee** the **completion** of the **task** by the teachers before attending the next training program in UK.

Proposal for the use of the HUB in the next courses in UK

[READ BEFORE POSTING HERE] How to write my case study? was created by *merlo*

The "Case Studies" category of the forum is meant to provide the trained teachers of the BEHAVE training courses with a virtual space where they can structure and share the case study on which they want to work. Each teacher involved in the training will add a topic here about a student with problem behavior. Then, during the courses, the trainers will revise some cases for each school team and will provide them with suggestions to define an intervention plan that will be carried out with the support of the BEHAVE application. At the end of this process, data gathered with the BEHAVE application could be anonimously published in the HUB as a good practice, according to the increasingly widespread of sharing scientific and educational open data.

Please apply the following step to add a case study:
1. Click on "new topic".
2. Insert a nickname of the student in the field "subject". Do not use nicknames that can disclose the real identity of the student. You are legally responsible for what you write!
3. Copy and paste the following structure of the case data in your topic:

Nickname
Age
Sex
Disorder
Comorbid disorder
Description
Place
Setting
Measure
Hypothesis of intervention

and fill in these categories with the data of the student on which you want to work. You will be able to fill in the fields "Measure" and "Hypothesis of intervention" only after having discussed the case with the trainers.

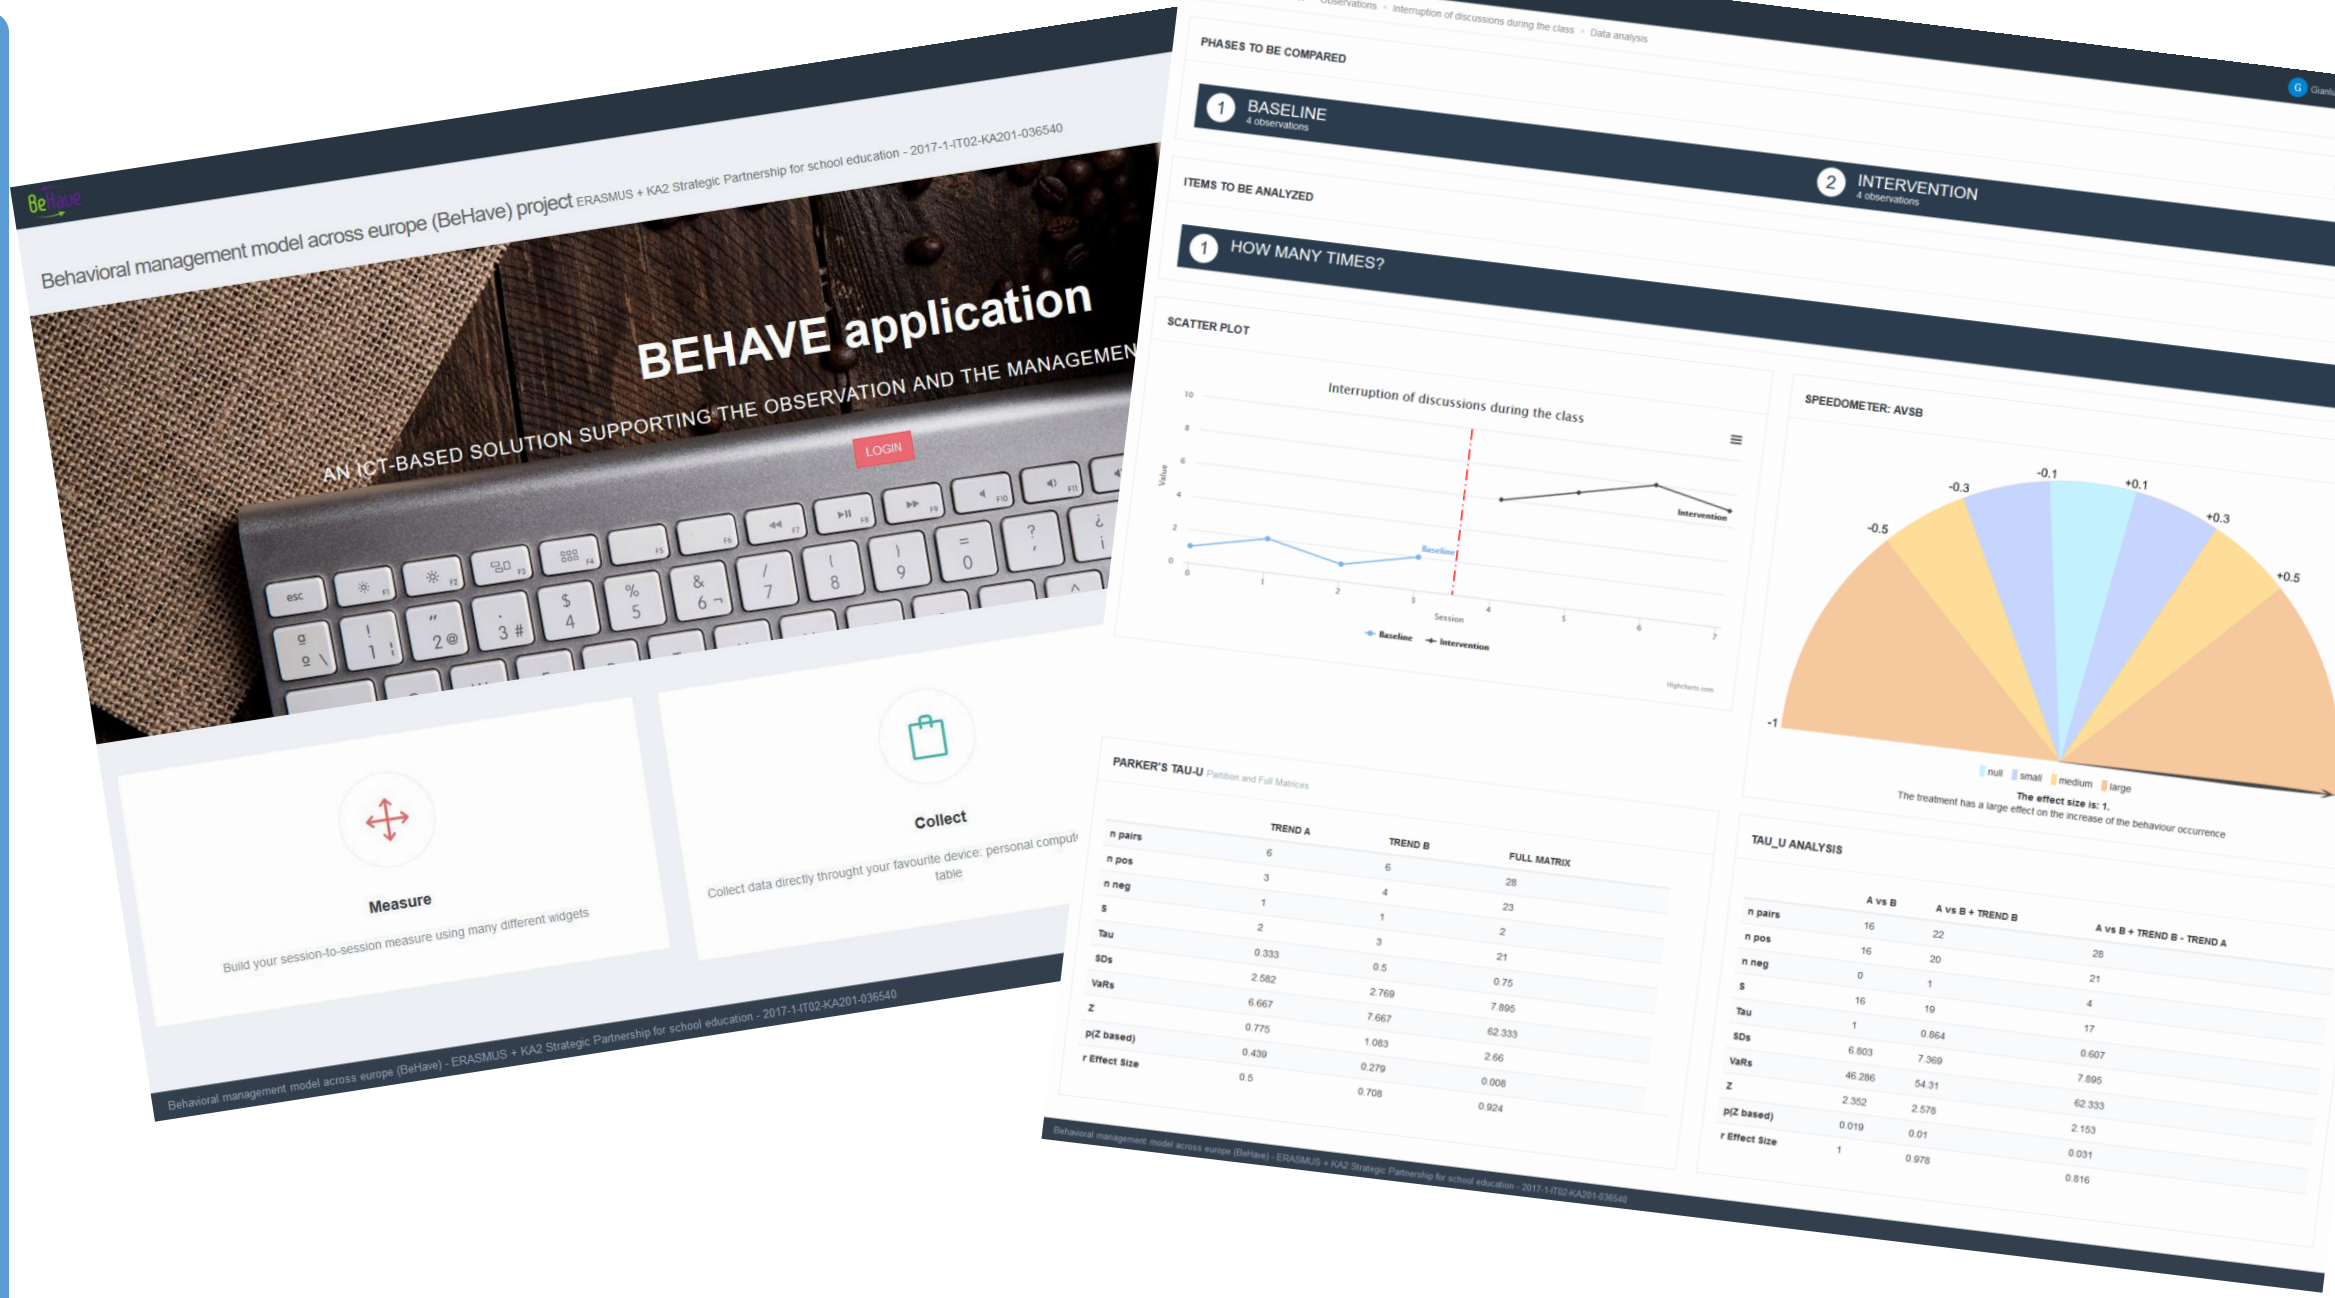
Debate

The teachers will **debate** during the **training course** about the best **behavioral strategies** they would apply in the proposed case study.

Hypothesis of intervention

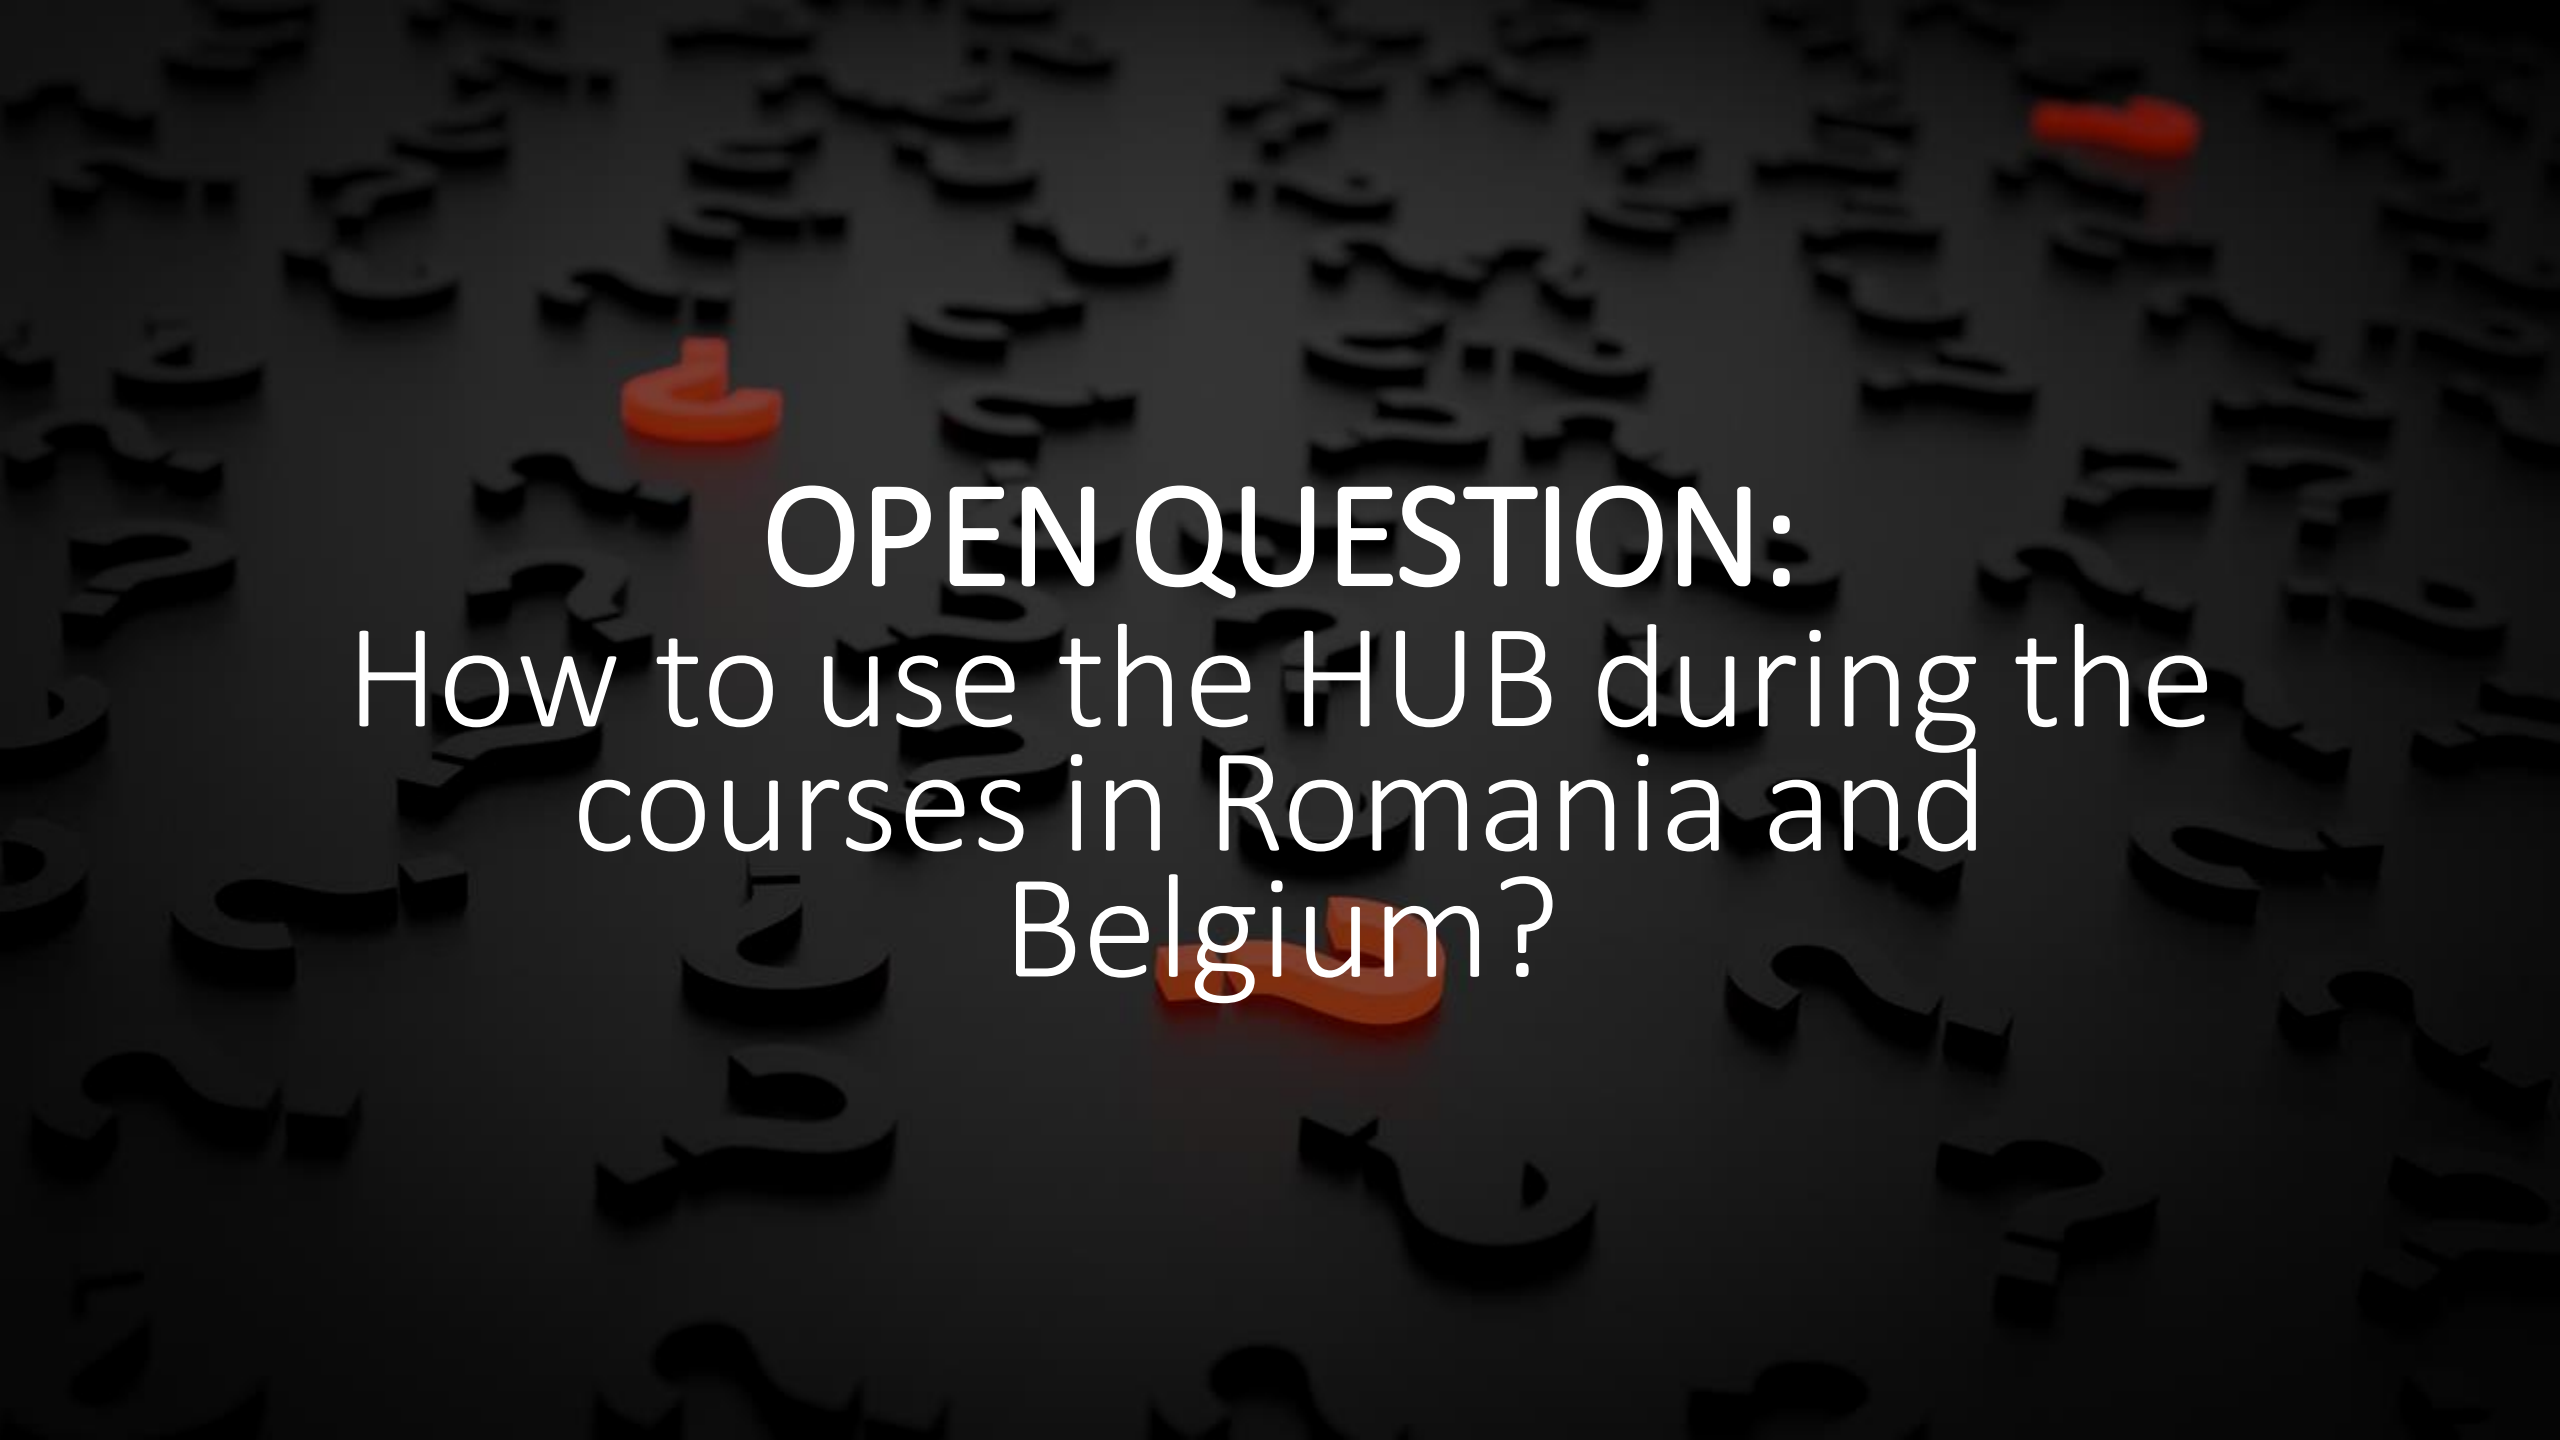
As a result of the debate, **teachers** will **define** with **trainers** and **peers** the **hypothesis** of **intervention** to face the problem identified in the context.

Collection of data with the Behave application and intervention

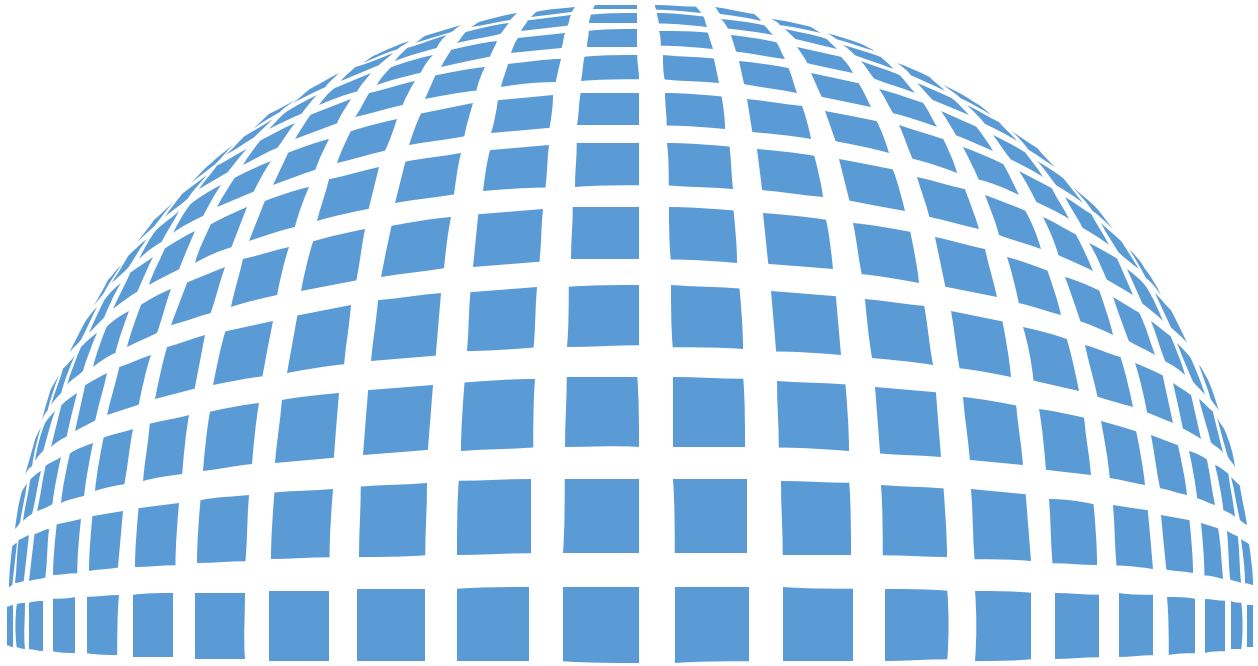


Sharing of the data collected in the BMH

- The cases added in the BEHAVE application could be released anonymously as open data.
- These datasets could be published only if the legislative problems about the publication of sensitive data are well addressed



OPEN QUESTION:
How to use the HUB during the courses in Romania and Belgium?

EXTERNAL STRATEGY


Build a **virtual community** of **teachers** not directly involved in the project BUT interested in **accessing** the project **materials**, the trained teachers shared **experiences** at school, and willing to contribute to enlarge the community of people interested in the topics of the project.
